

**JOB TITLE:**

Milling Operator

DEPARTMENT:

Production, including but not limited to: Milling, Turning, Grinding, EDM, Punch Press

IMMEDIATE SUPERVISOR:

Supervisor of designated department

PURPOSE:

To produce high quality parts efficiently, accurately and productively with minimal supervision.

Position Summary:

In this production position, you will be responsible for manufacturing high quality components on CNC or manual machines. The operator is responsible for keeping the machinery running at peak performance while performing operations such as deburring, measuring or preparation for parts through current or subsequent operations.

Critical Functions:

You will need to be accurate in your measuring, consistent, observant and detail oriented while having a strong ability for instruction comprehension and retention. Be able to analyze and adjust for optimum quality and productivity. Meet and exceed targeted production goals. Practice safe work habits, maintain a clean working environment, and perform routine maintenance and other duties as directed by the supervisor.

Requirements:

Have a high school diploma (or equivalent), a good understanding of the decimal system, be alert and able to stay focused on current projects. Be responsible, accountable, eager, neat, respectful, reliable and pleasant. Have a mechanical ability, quality mentality, and a willingness to learn and change with a positive attitude. Be capable of lifting 70 pounds(periodically), have good close-up vision and good dexterity and able to communicate accurately and concisely.

Bonus skills:

Previous use with hand held measuring instruments.
Previously worked in a machine shop or production environment.
Trade school background.
Previous CNC operation with understanding of tool offsets and operation.

Benefits:

Vacation, Holiday Pay, Insurance, Retirement Plan
